OBJECTIVE

Aspiring Product Intern passionate about creating impactful, user-centric digital experiences. Eager to contribute to PMO's mission of enabling creativity through innovative products by applying full-stack development, UI/UX design thinking, and data-driven insights.

EDUCATION

B.Tech in Computer Engineering,

BRAC's Vishwakarma Institute Of Technology, Bibwewadi, Pune.

2024 – 2027

CGPA: **8.52**

Diploma in Computer Engineering,

Government Residential Women's Polytechnic, Latur

2021 – 2024

Final Percentage: **94.47%**

Secondary School Certificate,

Jagat Jagruti Madhyamik Vidyamandir, Chakur

2021

Score: **90.80%**

EXPERIENCE

Web Development Intern – Inlight Technologies

Duration: 6 Weeks (2024)

Built responsive web pages using HTML, CSS and JavaScript.

ACHIEVEMENTS

Selected in top 20 from 190 group, Innohack 2.0 Hackathon-2025

CODING & PROBLEM SOLVING

- Solved 100+ problems on Strivers a2z, GeeksforGeeks
- Strong grasp of **DSA, logic building, and product optimization**
Languages Java, C++, Python

TECHNICAL SKILLS

Web & Mobile Technologies

HTML, CSS, JavaScript, Android (Java)

Frameworks & Libraries

ReactJS, Node.js, Bootstrap

Databases

MySQL, MongoDB, Oracle, SQLite

Version Control Git, Github

PROJECTS

Hand Gesture Recognition System

- Built a **real-time hand gesture recognition system** to control PowerPoint slides touch-free, using OpenCV and Mediapipe.
- Used Python automation to mimic keyboard shortcuts, making PowerPoint slide control **smooth and effortless, hands-free presentations** in classrooms and meetings.

- Lets presenters control slides effortlessly with hand gestures, making talks smoother and hands-free.

Smart Irrigation and Monitoring System

- Created a **smart irrigation system** with ESP32 and sensors to track soil and weather conditions in real time.
- Automated water and nutrient delivery based on actual crop needs, cutting waste and boosting yield.
- Built a **mobile app** and cloud dashboard with remote control, so the system can be managed from anywhere.

- Helps farmers save water and nutrients by giving crops exactly what they need, when they need it, for healthier and more sustainable farming.

Gas Agency Management System (Diploma Final Year Project)

- Built a **Gas Agency Management System** in PHP to automate bookings, stock tracking, and billing.
- Managed customer, supplier, and cylinder records in a **centralized database**.
- Generated **reports and dashboards** for easy monitoring and efficient agency operations.

- Simplifies gas agency operations by automating bookings, inventory, and billing for faster, more accurate service.

Voice Assistant

- Built a **Python voice assistant** that listens and talks, understanding commands to perform tasks like web searches, app control, and information retrieval.
- Combined **voice recognition, natural language processing, and text-to-speech** for smooth, hands-free interaction.

- Lets users control apps, search the web, and get information **effortlessly using just their voice**.

Online Voting System

- Built an Online Voting System for secure and easy web-based elections.
- Handled voter registration, authentication, and ballot casting in a simple, centralized platform.
- Ensured accurate and transparent results with automated counting and reporting

- Lets people **vote safely and easily online**, making elections quicker, simpler, and more reliable.

SOFT SKILLS

Product Thinking | Collaboration | Empathy | Communication | Adaptability | Time Management | UI/UX Orientation
