OBJECTIVE

I'm an **aspiring Software Developer** who enjoys solving problems and turning ideas into working solutions. With skills in **Java, C++, and Python**, I love building web, mobile, and IoT applications that are simple and useful. From creating a **smart irrigation system for farmers** to a **gesture-controlled presentation tool**, I focus on making technology practical and user-friendly. I'm excited to keep learning, growing, and contributing to projects that truly make a difference.

EDUCATION

B. Tech in Computer Engineering

BRAC's Vishwakarma Institute Of Technology, Pune

2024 – 2027 | CGPA: 8.68

Diploma in Computer Engineering

Government Residential Women's Polytechnic, Latur

2021 – 2024 | Aggregate: 92.97%

Secondary School Certificate

Jagat Jagruti Madhyamik Vidyamandir, Chakur

2021 | Score: 90.80%

EXPERIENCE

Web Development Intern – Inlight Technologies (6 Weeks, 2024)

I worked on designing and developing **responsive, mobile-friendly web pages** using **HTML, CSS, and JavaScript**. The experience taught me the importance of writing clean, reusable code and focusing on user-friendly designs. I also contributed to improving website performance and overall look, making the applications more engaging and efficient for users.

ACHIEVEMENTS

Selected in the top 20 from 190 groups, *Innohack 2.0 Hackathon-2025*

TECHNICAL SKILLS

- **Programming:** Java, C++, Python
- **Web & Mobile:** HTML, CSS, JavaScript, Android (Java)
- **Frameworks:** ReactJS, Node.js, Bootstrap
- **Databases:** MySQL, MongoDB, Oracle, SQLite
- **Tools:** Git, GitHub

CODING & PROBLEM SOLVING

- Solved over 100 problems on Leetcode
- Strong grasp of **DSA, logic building, and product optimization**.

PROJECTS

Hand Gesture Recognition System

- Built a tool that lets presenters control PowerPoint slides with hand gestures.
- Used **Python, OpenCV, and MediaPipe** to mimic keyboard shortcuts for smooth, hands-free presentations.

Smart Irrigation & Monitoring System

- Designed an **IoT system** with ESP32 and sensors to monitor soil and weather.
- Automated water and nutrient supply, with a **mobile app + cloud dashboard** to help farmers save resources.

Gas Agency Management System (Diploma Final Year Project)

- Developed a **web application in PHP & MySQL** to handle bookings, billing, and inventory.
- Simplified agency operations by automating records and generating reports.

Voice Assistant

- Created a **Python-based assistant** that responds to voice commands.
- Integrated speech recognition and NLP for tasks like web search, app control, and quick info retrieval.

Online Voting System

- Built a **secure web platform** for online voting with authentication and ballot casting.
- Ensured transparency and accuracy with automated counting and reporting.

SOFT SKILLS

Product Thinking | Collaboration | Empathy | Communication | Adaptability | Time Management | UI/UX Orientation
